

# ***Your Communication Challenges Haven't Changed....***

## ***....But Your Solution Has!***

Cinetcomm **TotalConnex™** is a field-proven hybrid communications solution for first responder agencies, blending Land Mobile Radio (LMR), FirstNet (Built with AT&T), terrestrial LTE and satellite wireless networks together to provide complete coverage everywhere you need to operate!

Land Mobile Radio network coverage, broadband mobile data, vehicle mapping and status, plus dial-up telephone is a reality across 100% of North America. This is a fully managed network service. FirstNet, 3G/4G/LTE and Satellite networks work in concert with **TotalConnex** routers, automatically selecting the least-cost, best quality transmission path based on carrier availabilities, **with zero user intervention**.

**TotalConnex** will scale to meet any agency mission

requirement, from deploying a couple of mobile units to hundreds.

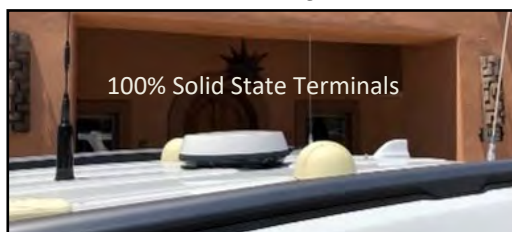

With **TotalConnex** there is no capital investment in towers, back office hardware and IT infrastructure to have a full-featured operational network.

Your existing land mobile radios can operate on the **TotalConnex** Network through hardware interfaces, both analog and digital. An encrypted multi-user Wi-Fi hub and wired ethernet connects all in-vehicle equipment and wireless accessories.

Reach out today for more information. **TotalConnex** is **the** Public Safety Grade communications solution that works in **any** operational situation or location!

### **Cinetcomm's TotalConnex™ Hybrid Network Solution is:**

- Total Access as a Service - Fully managed solution for LMR, broadband mobile data and fleet operations
- 100% network coverage across North America - Goes wherever you respond
- Operates automatically on up to five network backbones including FirstNet, LTE and Satellite
- FirstNet Certified vehicle equipment built into a small form factor (12.5" x 12.5" plate)
- No expensive system infrastructure or towers required
- Low monthly unit operating costs
- Customer Network Management and Fleet Mapping Portal included
- Merges different radio systems together for mutual aid operations
- Cost effectively supplements and extends the reach of existing Land Mobile Radio systems
- 24x7 Customer Care and Support
